ABOUT ME

Highly motivated aspiring full-stack developer with a background in home improvement and renovation. Skilled in a variety of programming languages including C, Python, and JavaScript, with experience in web development, algorithms, memory and data structures alongside work in development of artificial intelligence. Seeking a full-stack programming role to apply my technical knowledge and passion for technology.

EDUCATION

Harvard University, Cambridge, MA — *Certificate(s)*

January 2022-December 2022

Computer Science Certification from Harvard University through CS50 and EdX where the courses' primary focus was on C,Python,Javascript, HTML/CSS Web Development, Algorithms, Memory and Data Structures

October 2023-December 2023

Harvard CS50's Introduction to Artificial Intelligence is an intensive course that explores the foundational concepts and algorithms of modern AI, addressing technologies such as game-playing engines, handwriting recognition, and machine translation. Through hands-on projects, students gain practical experience in graph search algorithms, classification, optimization, and reinforcement learning, all implemented in Python.

PROJECTS

Listify — *List/Purchase Tracking web app*

- Used HTML/CSS, Jinja, Python, SQLite3, and SQLAlchemy to build a site with Flask web framework

Steam Stats — *Steam API Experiment/Data Site*

- Created a web application using Python, Django, React, and JavaScript to display user and friend data in an interactive way

Microblog— *Social media/blogging web application*

Web app that behaved as a blog-posting site formatted similarly to other social medias. Python, Flask, SQAlchemy and JINJA being primary contributors to the production of the web app, with Javascript, HTML/CSS and other additional languages and tools being secondary contributors.
